Title of the Invention: Powder cosmetic

[Claims]

[Claim 1] A powder cosmetic comprising (a) a fluorine-treated powder, (b) an oily component having a surface tension value (average) of not less than  $2.0 \times 10^{-2}$  N/m and (c) a component unstable in the presence of any one of light, oxygen and water, which is liquefied by friction of an application thereof.

[Claim 2] The powder cosmetic of claim 1, wherein the component (a) is a fluorine-treated powder obtained by treating the surface of a clay mineral with fluorine.

[Claim 3] The powder cosmetic of claim 1 or 2, wherein the component (c) is at least one kind selected from a whitener, an antiinflammatory, a humectant, a blood circulation promoter, a hair tonic, an antibacterial agent, a hormone, a vitamin, an enzyme, an antioxidant and an animal or plant extract.

[Claim 4] The powder cosmetic of any one of claims 1 to 3 comprising the component (c) in an amount of 0.001 to 10% by weight.
